**Simple food safety forms
that manage inventory,
audits, and analytics.**

COMPLIANCE

Paper forms trigger the four barriers to compliance.

There has been a 10% increase in food recalls over the last decade. Food safety is only getting harder.

Provision lets you build smart forms, and organize scans and SOPs, all in one hub. The homepage is a task centre that prioritizes food safety work. Provision forms are available offline, on mobile, and translated, making compliance accessible on the production floor.

1

Missing Forms

Assign forms with due dates to get reminders and overdue alerts.

2

Missed Requirements

Review SOPs and tips inside forms, and comment with questions.

3

Slow Forms

Connect current and prior forms to quickly autofill the shared data.

4

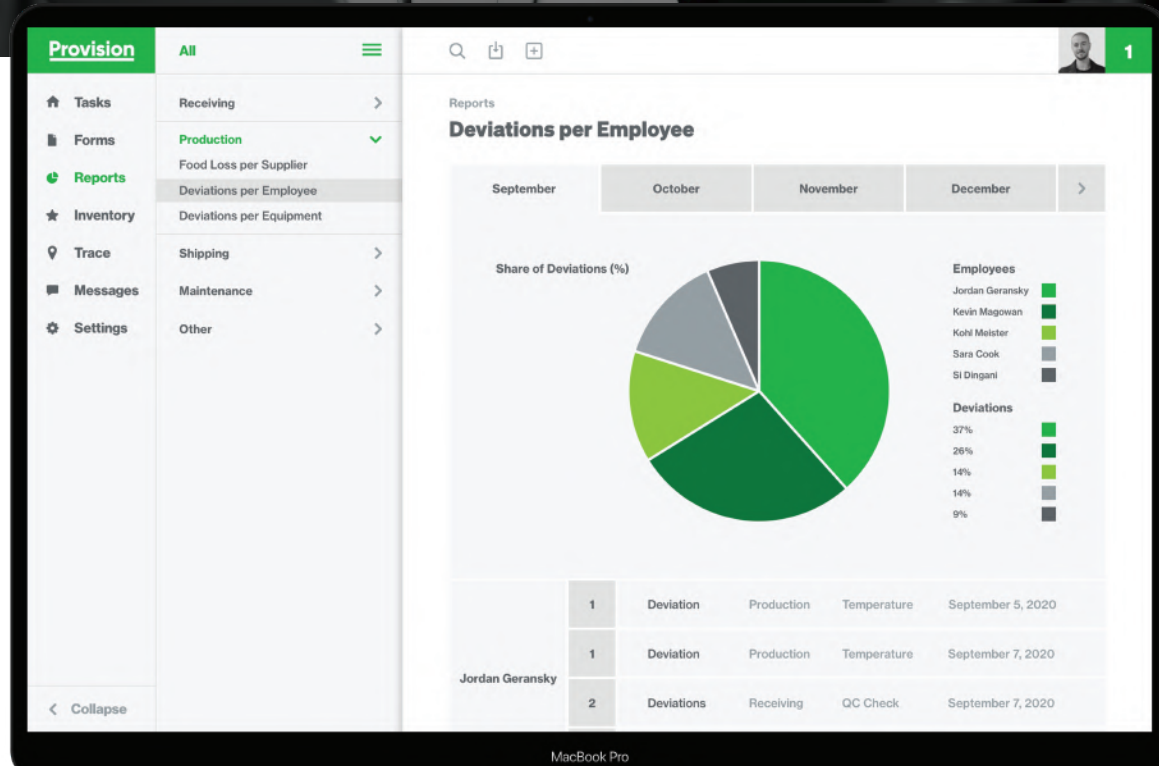

Deviations

Set rules on forms to catch process deviations as they happen.

“Rules and autofill can make Provision forms faster and more reliable than paper.”

- Danni Kneeland

Food Safety Advisor to TrueBuch Kombucha

MANAGEMENT

The data in your forms can help your process speed and control.

Inventory

Forms automatically track product quantities per location.

Audits

Instantly pull up every form and customer for a product.

Analytics

Track your process on dashboards populated by forms.

SETUP

We are phasing in Provision's new clients over three stages.

Spring 2021

Clients needing basic task and form functionality.

Summer/Fall 2021

Clients needing advanced automation and reports.

Fall/Winter 2021

Clients needing translation and DIY setup.
